

May 25, 2014

Parents,

As you know, students have been working hard, having fun and applying their skills the past two weeks on year-end enrichment projects in each subject area:

- In Language Arts, Classroom Yearbook articles and pictures are now complete and will be published next week as a blog on the classroom website.
- In Social Studies, Presidential Trading Cards have been presented, duplicated, and laminated and will be passed out next week.
- In Math, students have finished surfing the web in class to decide how they will spend \$1,000,000. Their ledgers, checks and documentation have been submitted for grading. (Unfortunately, their birthday and Christmas wish-lists may have suddenly gotten a wee bit more expensive - sorry!)
- In Science, each student presented their bridge research on Friday to the class and our special guest, Darrell Easterling. Afterwards, Darrell gave us a wonderful overview of his current engineering project on the Foothills Parkway bridge construction. It's always an education and a pleasure having Blaise's dad join us in the classroom!

This coming Tuesday we will have our final Classroom Economy auction and Year-End party. Wednesday and Thursday we will complete end-of-year benchmark assessments and prepare our "Who's That Pokémon GameShow" skit for Friday's school talent show.

If any student would like the opportunity to showcase an individual talent (dance, voice, taekwondo, etc.), please let me know ASAP so that I can add them to the program.

Have a wonderful Memorial Day weekend!

Mr. Mac
